AutoCAD is a powerful 2D CAD program that can be used for drafting, design, modeling, and rendering workflows. It can be used for 2D and 3D drafting, 2D and 3D modeling, and 2D and 3D rendering. AutoCAD LT is a desktop app designed for beginners that runs on the free AutoCAD platform. It is available for Windows and Mac OS X operating systems. AutoCAD Architecture Autodesk has come up with several design concepts that are used in AutoCAD. The AutoCAD Architecture concept helps in understanding the architecture of an AutoCAD program. So the AutoCAD architecture is divided into following main components: Core Services Core Services Core Services are basic functions and services that are used by all other services in the AutoCAD Architecture. The following diagram shows the AutoCAD Architecture Core Services: Core Services in AutoCAD Architecture Core Services in AutoCAD Architecture Core Services in AutoCAD Architecture Core Services in AutoCAD Architecture Here, you can see that the Core Services are AutoCAD CORE architecture, not the Windows Services. In 2006, AutoCAD was available on Google's new Google Code web hosting service as a free download for open source developers. AutoCAD LT is an open source, small footprint, real-time vector graphics drawing program, focusing on making a CAD program simple and easy to use. It is included with the free version of AutoCAD as AutoCAD LT 2010. Business and technical users of AutoCAD may create and use custom components called "plugins". These components are enabled by writing JavaScript or LUA code. CAD Plugin Compatibility AutoCAD provides standard Microsoft Visual Studio 2008 and Visual Studio 2010 plugins. In addition, there is a Visual Studio 2008 and Visual Studio 2010 plugin framework for AutoCAD 2010. These tools include a command line interface (CLI) and an application programming interface (API). AutoCAD 2008 and AutoCAD 2010 support the following plugins: Autodesk Exchange App for AutoCAD: a Python.NET plug-in written in Visual Studio 2008 and Visual Studio 2010, which adds basic functionality such as the ability to view the current drawing in the background while opening a new drawing and the ability to display the current drawing on the host application's floating window. The default behavior of the application is to open a new window with the corresponding drawing. The application can be used with AutoCAD LT 2009. AutoCAD 2008 and AutoCAD 2010 also support the following Excel plug-ins: Autodesk Exchange App for Excel, a Python.NET plug-in written in Visual Studio 2008 and Visual Studio 2010, which adds basic functionality such as the ability to open and close drawings in the background. The default behavior of the application is to open a new window with the corresponding drawing. The application can be used with AutoCAD LT 2009. AutoCAD 2008 and AutoCAD 2010 also support the following PowerPoint plug-ins: Autodesk Exchange App for PowerPoint, a Python.NET plug-in written in Visual Studio 2008 and Visual Studio 2010, which adds basic functionality such as the ability to open and close drawings in the background. The default behavior of the application is to open a new

window with the corresponding drawing. The application can be used with AutoCAD LT 2009. AutoCAD 2008 and AutoCAD 2010 also support the following Word plug-ins: Autodesk Exchange App for Word, a Python.NET plug-in written in Visual Studio 2008 and Visual Studio 2010, which adds basic functionality such as the ability to ca3bfb1094
